Thank you for your business in 2010 and congratulations on a successful growing season considering the challenging growing conditions.

Syngenta's Hilleshög® brand varieties emerged extremely well under the harsh spring conditions

experienced in 2010. Combining our strong emergence with stacked disease traits resulted in excellent reports on sugar quality and tonnage of Syngenta's Hilleshög brand material.

You can rest assured that Syngenta will continue to provide consistent performance varieties in 2011.

Please contact your local Hilleshög brand representative to learn more about our 2011 varieties.
